DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hill (USPN 5,813,696).

Hill discloses an airbag that has a front wall facing an occupant to be restrained, a back wall, and a side wall, and the front wall being detachably connected to the back wall by element 60, 70. The connection between the front wall and the back wall is "severed" by the unfolding of the side wall when the airbag is inflated. Hill shows the side wall portion of the airbag is unfolded before the inflation of the central portion of the airbag due to the restraining element 60.

Allowable Subject Matter

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art does not show an airbag with a front wall connected to a back wall wherein the connection is formed by at least one loop on the front and back wall respectively and further having a separate latching element to connect the loops, nor does Prior Art show the latching element as a traction cable attached at one end to a side wall of the airbag.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prescaro et al. (USPN 5,489,119), Fowler et al.
